Date Started/Completed: 4/22/08 – 5/1/09

Dollar Value: \$700,000

Project Team: Robert E. Bruggink, P.E. – Principal in Charge  
Justin F. Longstreth, P.E. – Project Engineer  
Matthew Kozak, CAD

Project Description:

Design engineering to develop this 70 acre site into an RV resort campground that includes 299 sites, a public clubhouse, registration building and a 5 acre pond. Engineering responsibilities included conceptual park layout, site grading, utility and stormwater management design and driveway approach design. MDEQ's approval of a permit to perform wetland fill and mitigation activities was also required in order to construct an access to the site from Riley-Thompson Road over Duck Creek. This 2008 project was 100% privately funded.
